

Active Magnetics Research Pty Ltd

MAGNET VALIDATION REPORTS ARE IMPORTANT

Active Magnetics Research carries out Magnet Validation & Verification Reports using currently calibrated instruments, using procedures and documentation endorsed by HACCP International.

Validation Reports Establish:

- ◆ If the Magnet meets current standards.
- ◆ If the Magnet is as effective as it could be in its particular location.
- ◆ If the Magnet is still as effective as it was at the installation date.

Reports can also include:

- ◆ Recommendations to upgrade equipment to Food Safe Standards.
- ◆ Comparative analysis of Metal Contamination at Critical Control Points.

How Often Should Magnet Validations Be Carried Out?

Initially on supply, then annually, finally as dictated by history.
